

Open RAN System Integration (II) - Management and Governance

This learning program presents the new problem of managing and governing Open RAN implementations in a multivendor ecosystem, equipping the student with the necessary knowledge to be able to tackle this complex task.

Upon completion of this learning program, you will be able to:

- Explain system integration services, reference architecture and the governance model for multi-vendor coordination and SLA compliance.
- Describe Open RAN SW commissioning and integration on multi-vendor hardware and run Zero Touch provisioning scripts for automated deployment and life cycle management.

COURSE MODULES

- Introduction - Open RAN System Integration (II) – Management and Governance
- Management and Governance - Overview
- Multivendor System Integration Governance
- Product Life Cycle Management Through CI/CD
- CI/CD Application to Life Cycle
